	Question: Most effective learning aspects of course
	Interactive and on top of things
	i liked how the weekly essays were by opinion and had no right or wrong answers. he didnt ask for them to be long, just a page or so which i liked because when it has to be a certain length like 2-3+ pages, and i dont have much to add, i can ramble which doesnt help how strong my paper is. he was very nice and i liked his video lectures. he included lots of different resources every week to help with the quiz and how to respond in the essays. overall, the class was simple, easy to follow, and not overbearing with assignments.
	The VERY structured weekly schedule led to me being successful in this class. There was never a change up or chance to be confused. The class was very straight forward, and the expectations are not unfair.
	The Ideas to Ethics Essays were the most effective because it helped to deepen understanding of topics and apply the topics to hypothetical or real world situations. It allowed personal expression and creativity.
	The essays were a great way to reflect on the material.
	The most effective aspects of this course were the engaging lectures and the way current social issues were tied to academic theories. Dr. Koch did a great job connecting sociological concepts to real-world examples involving drug use, deviance, and public policy. The integration of videos, personal stories, and interactive discussions made the material more relatable and impactful.
	The most effective were the videos that correlated to what we were learning and wasnt just articles.
	n/a

	The lecture videos were very helpful since we dont have in-person classes. They helped me break down information more easily and understand what I was supposed to take away from each attached reading.
	The way real life events were incorporated into learning
	videos and format help reinforce information. Assignments were allowed with ample time.
	I enjoyed the lectures and the I2Es which took the topic of the lecture and made us talk about it personally, either out of experience or opinion, to further cement the context of the lecture in our mind and really think about it
	Question: Least effective learning aspects of course
	Nothing!
	i think as long as you listen to the video lectures, youre fine. if you dont, understanding the powerpoints on their own can be difficult. i like powerpoints with more words because its easier to go back to later and take notes off of, but i didnt have a problem listening to the lecture videos either.
	Honestly, I have nothing to put here. This class is perfect the way it is.
	I think everything was effective overall. Sometimes, the readings were a bit lengthy.
	The amount of article reading was a little much. I would prefer more lecture time or PowerPoint/ text book information than as many articles as there were.
	This was a great course overall, but one small challenge for me was keeping up with some of the theoretical concepts when we moved quickly into applying them. A little more time reviewing the main ideas could have helped me feel more confident, but I still really enjoyed the content and learned a lot.
	The least effective was that some of the articles were too long and could be boring while there were other articles that had a lot of information but were actually interesting.

	NA
	The course was pretty intuitive, but it could be slightly more interactive.
